

BI-CON SERVICES

Bi-Con Services, Inc. has helped energy and manufacturing companies around the world compete in the global marketplace for over 50 years. Our strong divisions can work together or individually and with local partners, to develop, engineer, manufacture, construct and manage domestic and international projects. Bi-Con has the expertise to meet the requirements and schedules for projects great and small: whether you need a complete facility plan or a simple one-time renovation. One of the keys to Bi-Con's success and growth is its strong divisions. These divisions function as business units and more powerfully when combined to provide turnkey solutions.
