

BI-CON

ELECTRICAL

Bi-Con Electrical safely provides quality industrial electrical construction services, primarily in the natural gas and energy industries. Established in 2004 as an expansion of Bi-Con's already established company with focus on power, control and automation, emergency shutdown systems, grounding and testing, medium voltage installations, UPS, solar energy systems, emergency generators, and instrumentation and tubing systems.

MISSION STATEMENT

The mission of Bi-Con Electrical is to provide top quality electrical services with the customer's needs in mind. When electrical services are needed, we want our clients to think of Bi-Con Electrical first. We will provide electrical construction services of the highest in safety, quality, on-time, competitive pricing with a professional workforce. We will continuously look at improving our services with the latest in new technologies and an emphases on providing solutions to problems.
